PROFESSIONAL PROFILE

B.Tech (CSE) student at NIT Jalandhar with hands-on experience in full-stack web development and frontend development. Proficient in React, Next.js, Node.js, Express.js, MongoDB, C++, and Python, seeking software engineering or full-stack roles.

EDUCATION

- National Institute of Technology Jalandhar** August 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering
CGPA: 7.79/10.00 Jalandhar, India

ACHIEVEMENTS & CERTIFICATIONS

- Qualified GATE 2026 (CS) with AIR **15937** and GATE Score **415** (2026)
- Winner**, Cipher Quest 2025 (Cyber Security Contest) — NIT Jalandhar (Apr 2025)
- Deloitte Australia Cyber Security Job Simulation — Forage (May 2025)
- Solved **170+** problems on LeetCode — DSA & Problem Solving

Work Experience

- Web Development Intern** June 2025 – August 2025
Ikipendence — Remote
Roles & Responsibilities:
 - UI Component Development:** Built dynamic, responsive React components for the **"Wall of Passion"** feature using TailwindCSS, ensuring scalable, modular layouts with pixel-perfect rendering across all device breakpoints.
 - Feature Engineering:** Owned multiple UI/UX components for **"Seed of Individuality"** — implementing animated transitions, dynamic content rendering, and interactive storytelling elements in close collaboration with the design team.
 - Code Quality & Collaboration:** Conducted code reviews, applied clean component architecture (reusable hooks, separation of concerns), and maintained standards across the Git/GitHub repository aligned with the product roadmap.
 - Cross-Functional Coordination:** Worked with PMs and designers to interpret Figma mockups and ship production-ready interfaces within sprint timelines.

PROJECTS

- Personality Game — Gamified Assessment Platform** June 2025
Next.js, React, TailwindCSS, JavaScript
Roles & Responsibilities:
 - Project Lead & Architect:** Led end-to-end design and engineering of a production-deployed gamified personality assessment platform — defining component hierarchy, state management strategy, and data flow architecture.
 - Assessment Workflow:** Built the full question-to-result pipeline with dynamic rendering, conditional branching, progress state persistence, and adaptive scoring to generate personalized user insights.
 - Responsive UI/UX:** Delivered a mobile-first, accessible UI (ARIA roles, keyboard navigation) using TailwindCSS, deployed live with optimized React state management for stable real-user performance.
- Food Ordering Application — Desktop GUI** April 2024
Python, Tkinter
Roles & Responsibilities:
 - Application Design & Development:** Sole developer of a GUI-based food ordering desktop app in Python/Tkinter, handling the full lifecycle — from requirements and UI wireframing through development, testing, and delivery.
 - GUI & Widget Engineering:** Built an interactive widget system (menus, input fields, dynamic order lists, confirmation dialogues) enabling users to browse, customize, and place orders through a structured, intuitive interface.
 - UX Optimization:** Applied UX layout principles and real-time input validation to ensure logical navigation flow and graceful handling of edge cases (empty orders, invalid inputs).

TECHNICAL SKILLS

- Languages & Web:** C++, Python, C, JavaScript, TypeScript, HTML5, CSS3, React.js, Next.js, TailwindCSS
- Backend, DB & Tools:** Node.js, Express.js, MySQL, MongoDB, Git, GitHub, Postman, VSCode
- CS Fundamentals:** DSA, OOP, Operating Systems, DBMS, Computer Networks

ADDITIONAL INFORMATION

Languages: English (C1 — Professional), Punjabi (C2 — Native), Hindi (C1 — Professional)
Availability: Open to full-time roles, internships, and remote opportunities
